

Today people believe, because of the MEDIA,  
... they will be killed by fresh air, sunlight and hugs.

**There's a 0.01%  
chance of rain  
and I'm appalled  
that nobody  
outside is using  
their umbrella.**

People are wearing the mask, because of a PHONY VIRUS.

[MASKerade AT THE CDC - YouTube](#)

Our ancestors children were allowed to roll in a chemical free lawn and dirt, use a hose to clean off the dirt and aren't slathered in sunscreen chemicals. Our ancestors survived the Spanish Flu because they were poor or weren't in the military. No one could afford the massive aspirin they buy today and definitely weren't taking vaccines. They were the cheapest people on the planet because of what they went thru.

In the Doctors office ... there would be many secret notes put in your chart with words like hypochondriac and if you had kids and sent them in to be tested perhaps "Müchausen".

If you went to your Doctor asking to be tested for something you have no symptoms for, what would you be called?

It is insane ... if I post on my social media about healing the body in natural ways ... it may be deleted as "dangerous", when others can post articles, pictures of violence, pedophilia, killing police officers without censorship.

***Used Mask were tested in Switzerland.  
The result was devastating.***

<https://amp.blick.ch/wirtschaft/gebrauchte-exemplare-getestet-so-gruusig-ist-ihre-corona-maske-wirklich>

*The consumer magazine "K-Tipp" removed the masks from 20 public transport commuters and tested them in the laboratory.*

*The result was devastating.*

*The masks are full of bacteria and mold. The reason: masks act like filters, the air you breathe flows through the fibers of the tissue.*

*This has consequences: bacteria and fungi get stuck.*

*They multiply quickly in a warm, damp mask environment.*

*The "K-Tipp" tests show that most commuters wear their masks for several days or even weeks.*

*Many say they don't want to produce unnecessary waste. 11 of the 20 masks tested contained more than 100,000 bacterial colonies. Three of them more than a million.*

*Pneumonia and meningitis, but that's not all: the microbiologists also found staphylococci on 14 of the 20 masks. The bacteria can cause pneumonia and brain infections.*

*The "K-Tip" also found mold and yeast on 15 of the 20 masks tested.*

*According to the BAG, these can lead to irritation of the respiratory tract and eyes.*

*There is only one thing: to follow the instructions of the FOPH and to replace masks as soon as they become damp. (pbe)*

*Infection as a result of mask wearing ...*

*Girl got staph and is critical condition from wearing a mask.*

This is bacteria grown in a PetriDish from a swab taken from the inside of a mask after 20 minutes of use.

This is what you are breathing.

## Universal Masking in Hospitals in the Covid-19 Era

May 21, 2020

We know that wearing a mask outside health care facilities offers little, if any, protection from infection. Public health authorities define a significant exposure to Covid-19 as face-to-face contact within 6 feet with a patient with symptomatic Covid-19 that is sustained for at least a few minutes (and some say more than 10 minutes or even 30 minutes). The chance of catching Covid-19 from a passing interaction in a public space is therefore minimal. In many cases, the desire for widespread masking is a reflexive reaction to anxiety over the pandemic.
