

## *The 3. World War*

*The most International in the History of Humanity,*

*the most insidious,*

*with the lowest morality that ever was,*

*the most destructive*

*and the most humiliating war is going on around us.*

*Against all the peoples of the globe,*

*it is directed against the whole Humanity.*

*Not a single religious denomination is left out, both sexes,*

*all walks of life and all ages.*

*Vaccinated mothers with their milk*

*even babies are under attack!*

***The Global War on Humanity***

<https://www.bitchute.com/video/zv0aywF0vglq/>

- **Most global** because it covers all nations, even the neutral states and the never-warring Kingdom of Bhutan!
- **Most insidious**, because no country received a message of war before its attack — not even the Nazis did it during World War II!
- **Worst of all**, because the attacked are innocent and the attack was "provoked" by the mere existence of the attacked, and the animals can be among the attacked, so far only fungi and plants are not Covies, but it is only a matter of time.
- **It is most destructive** because there will be more victims of this war than all the wars combined so far, the goal is to destroy the entire human race. The devastation also affects the animals! It's like alien creatures want to occupy the Earth at the cost of destroying humanity!
- **Most humiliating** because you are expected to play a foolish play, disguise yourself, defend yourself against something that is likely to happen to you, sacrifice your freedom, your wealth, your job, your free action, and if the situation requires your play, loved ones on the altar! If you

don't pretend to be stupid from the beginning to the end who nods at everything, you could be exposed to revenge on you or your family!

### **What proves that there is war and a state of war?**

1. The national economy is subordinate to this war, and coveting is a top priority.
2. With curfews and other restrictions, you will feel like you are no longer your own master! This only happens in a war-torn country!
3. An armed military is deployed to secure strategically important objects against you, because a machine gun is ineffective against a phony virus, it can only be used against you!

Now that everything has been clarified and explained in order to understand the situation and enlighten your consciousness, we would like to draw your attention to the following facts:

To warn and prepare the population for lack of electricity,

fuel, food and utilities in the future.

You had to realize that you were attacked, dehumiliated, exploited and finally they want to destroy you!

Everything is uncertain around you and the crisis is full!

Your basic constitutional rights have been nullified ...

### **Recommended actions:**

1. Light up your family Instead of scattering in the direction of the wind rose (this is the trend today) live together, move in close proximity to each other!
2. For every underlying disease, look for a doctor or naturopath who is willing to take care of you and your family if madness hits the skies!
3. Prevention is paramount! Pursue a lifestyle that minimizes the development of the disease, learn and practice detoxification and healing techniques, learn about herbs and their healing effects!
4. Have a backup base where you can pull yourself out if you

are forced to flee your current place of residence!

5. If you live in a city, move into a rural property with as large a garden as possible.

6. Produce as much food as possible with your family, if you reach a crisis, don't be deprived! Learn how to store them!

7. Accumulate an optimal reserve for everyday life!

8. Study traditional technologies so that you still have e.g. your detergent from the ashes when the world collapses around you!

9. Become a micro-economy with your family that creates the widest possible range of self-sufficiency!

10. Choose a place that is close to a natural water base, but at the same time the risk of flooding can be ruled out!

11. Have your own well for irrigation and drinking water, process your own sewage, have wood heating for your rubbish, and an oven and composter for baking.

12. You only have to keep livestock if you are a carnivore! In this case, try to master the ins and outs of their breeding!

13. Continue an organic farm!

14. Make a plan every year to meet your needs!
15. Make friends with other sensible individuals and families like you, build your protective moon yard!
16. Have a cellar, storage!
17. Learn to prune, inoculate on wildlife so you don't have to bother with spraying and pruning!
18. At least part of your property should be able to withstand warm winds above 40 degrees and cold and strong winds below 25 degrees! You can also get the latter with slice-lifting protective planting from fast-growing tree species!
19. Have a person in your family have a car and a license if you have to flee quickly! A larger vehicle is recommended, in which you can pack the most necessary ones!
20. Don't keep your savings in financial institutions, have some precious metals! You can also invest in farmland, forests and residential properties!
21. It is advisable to acquire a non-licensed weapon and practice it for sports purposes!
22. Build barter with individuals and communities, because it

works even in the event of a total collapse of the monetary system!

23. Prepare and not be shocked if there is no electricity, fuel, internet and telephone! Store gasoline, diesel for at least 1 year, have a generator and battery.

24. Support political forces that are not affiliated with current parliamentary parties and international organizations, fighting for a normal life!

25. If you can, live on the outskirts of the village, the center is always looted first!

26. Get involved in self-organizing settlement protection activities! Get in touch with surviving groups!

27. Take time to recognize, collect, and prepare wild edible plants and edible wild mushrooms. Grow mushrooms too!

28. Practice a lifestyle that produces as little garbage as possible! Think about what will happen to you if the garbage truck crashes!

29. Be patient with your other family members who are not yet at the level of awareness like you and who still believe in

the mirrors and the coming of the prince.

30. You see, you can't do most of the above alone! If your family does not have or is unsuitable, contact families and communities with a survival program!

31. Don't be surprised by anything in the future! Don't be intimidated and shocked!

Provide support for the rest of your family!

32. Be a drone, be a radio amateur!

33. Do not doubt the weight and variety of the task! No bad situation just bad strategy!

Whatever you do about this will increase your and your family's chances of survival and give you superiority over your fellow human beings who are not developing in this direction!

Remember: you are no longer as vulnerable as you were before you read this!

Blessings to Humanity - Translated from Hungarian.
